SARS-COV-2 Nucleocapsid Protein

Description	
Source	Recombinant SARS-COV-2 Nucleocapsid Protein is expressed from E.coli with His tag and Avi tag at the N-Terminus.
	It contains Ser2-Ala419.
Accession	QHD43423.2
Molecular Weight	The protein has a predicted MW of 48.9 kDa. The protein migrates to 47-52 kDa based on Tris-Bis PAGE result.
Endotoxin	Less than 1EU per μg by the LAL method.
Purity	> 95% as determined by Tris-Bis PAGE
Formulation and	1 Storage

Formulation and Storage

Formulation Supplied as 0.22µm filtered solution in 10mM PBS (pH 7.4).

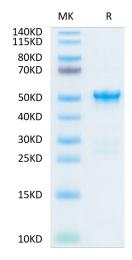

Storage Valid for 12 months from date of receipt when stored at -80°C. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Nucleocapsid protein (N) is the major viral structural component; its main function is to protect and encapsidate the viral RNA forming viral RNP complex. It is encoded by the S segment vRNA and is abundantly expressed in the cytoplasm of infected cells.

Assay Data

Tris-Bis PAGE

SARS-COV-2 Nucleocapsid on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.
